POLICY INFORMATION	Proposed Exp.date	<p>Date on which the terms and conditions of the policy will expire.</p> <p>The normal policy period (effective date to expiration date) is one year. However, a policy may be issued for any length of time up to a maximum of three years. Certain rules and endorsements must be used if the policy is written for more than one year. It may be necessary to use Effective and Expiration Dates that do not indicate a one year term, to concur with other policies.</p>

POLICY INFORMATION	Normal Anniversary Rating Date	Normally, the rates used are in effect on the effective date of the policy. NCCI Manual rules require that the rates apply for a period of one year. If a policy is cancelled or short-termed, the rating bureau requires the original effective date to be considered the Normal Anniversary Rating Date for both rates and experience modifications. This is temporary and will last until the next renewal when the new policy effective date will again determine the rates. The rule is intended to prevent wholesale cancellations by insureds and companies to take advantage of rate and/or rule changes. For cancelled or short-termed policies, enter the original effective date.
POLICY INFORMATION	Participating/Non-Participating	A Participating policy may result in reduced premiums through the payment of policyholder dividends declared by the insurer. Some policyholder dividends are based on actual experience of the applicant. If such a program is available through the company in the covered state, indicate whether the policy is to be on a Participating or Non-Participating basis. Check with your company on the availability of plans.
POLICY INFORMATION	Retro Plan	Retrospective Rating Plans Permits the adjustment of the final premium based on the actual premiums and losses of the applicant, subject to the plan's minimum and maximum premium limits. One to three year plans may be available. Check with your company on the availability of plans.
